

## **Skip Tracing** *from IDValidation*

### **Overview**

Skip Tracing is an in-depth, complex methodology of locating an individual who cannot or does not want to be found. We utilize public records, surveillance, online research, and other means to track down an individual and provide detailed reports on addresses, phone numbers, place of employment, and other information requested by the client.

### **What we do**

Whether it's an unintentional skip or a case of ID theft, our expertise successfully resolves over 90% of delinquencies.

-  We help organizations prevent costly charge-offs and maximize P & L recoveries
-  Our dedicated team of in-house Skip Analysts was founded in 2001
-  We locate debtors for financial institutions, law enforcement, property management and more

Our Skip Analysts are committed to reducing delinquency ratios while maximizing return on losses. Our business practices are based upon knowledge management skills for maximizing the return on intellectual/information resources.

### **Our services include**

-  Debtor/Vehicle locate and recovery services
-  Assets developed and verified
-  Experienced, professional Skip Analysts with a minimum of 10 years experience
-  Extensive database resources – Government, Public, Private and Proprietary
-  National network of licensed/bonded/insured repossession agencies
-  1M Errors and Omissions liability insurance
-  No recovery expense guesswork – 3 tier static pricing
-  Customized programs offered based upon client need

Founded upon the core philosophies of vision, wisdom and integrity, we take pride in placing the needs of clients first. From new account origination fraud analysis to locate and recovery services, we have a track record of success through diligence.

### **What we provide**

Fresh, timely contact data is supplied for reaching consumers earlier in the collections cycle to recover more dollars.

-  Receive verified phone number and address information
-  Contact information provided to credit-granting agencies for hard-to-find consumers
-  Better identified cell phone numbers to develop the right treatment approach

**Locate evasive debtors and/or collateral with Skip Tracing from IDValidation**
